The Institute for Sustainable Futures (ISF) was established by the University of Technology Sydney in 1996 to work with industry, government and the community to develop sustainable futures through research and training. Sustainable futures result from economic and social development that protects and enhances environment, human well being and social equity. Where possible, we adopt an interdisciplinary and participatory approach to our work. We aim to engage with our partners, funding agencies and clients in a co-operative process that emphasises strategic decision-making.

For more information contact the ISF on (02) 9209 4350 or at isf@uts.edu.au. The ISF website can be visited at www.isf.uts.edu.au

The Social Values and Sustainability Group is part of the Division of Minerals, the lead Division of the Sustainable Minerals and Energy Group in CSIRO. It carries out social research on environmental and social issues pertaining to minerals and the mining industry, with an emphasis upon community engagement and participatory research processes relevant to the well being of all Australians. In the past two years it has also undertaken research in the integration of social, biophysical and technological research.

For more information contact CSIRO Minerals on (03) 9545 8500 or at minerals@csiro.au. The CSIRO Minerals website can be visited at www.csiro.au.
